PROFESSIONAL SUMMARY

Detail-oriented Digital Content Analyst with 3 years 11 months of experience in data validation, record management, dashboard updates, and structured reporting on anti-piracy projects. Skilled at verifying data accuracy, documenting findings, and delivering daily client-facing reports. Building a data analytics portfolio with Excel, SQL, Power BI, Python, and n8n. Seeking an entry-level Data Analyst role.

TECHNICAL & PROFESSIONAL SKILLS

Data Analysis & Reporting: Data Validation, Data Quality Checks, Data Cleaning, Data Visualization, KPI Reporting, Dashboard Updates, Record Categorization

Tools: Microsoft Excel, SQL, Power BI, Python

Automation: n8n, Telethon, Telegram API, ETL Workflows, Workflow Automation

Professional: Team Coordination, Stakeholder Reporting, Documentation, Task Review, Issue Escalation

PROFESSIONAL EXPERIENCE

WARX Digital Private Limited | Erode, Tamil Nadu *Dec 2022 – Present*

Senior Digital Content Analyst (promoted from Junior)

- Guided junior analysts on project requirements, task workflows, and queries to support consistent team output.
- Reviewed completed tasks for link accuracy, status, categorization, and completeness before reporting to protect data quality.
- Updated operational dashboards and tracking sheets with verified findings to keep project records and status accurate.
- Prepared daily reports on new links, completed work, pending items, and status for internal teams and clients.
- Monitored piracy-related content across platforms, including Telegram, and documented findings for reporting and removal workflows.
- Escalated discrepancies and project issues to team leads and management, and followed up on pending tasks.
- Explained automation steps to team members to help streamline repetitive link collection and verification.

Junior Digital Content Analyst

- Searched and monitored potentially pirated content across assigned platforms and project topics.
- Collected URLs and documented findings in tracking sheets and project systems for verification and reporting.
- Checked link availability and status, organized records, and updated tracking data to project requirements.
- Delivered verified findings and daily progress updates to support client reporting and content-removal workflows, meeting project guidelines and timelines.

PORTFOLIO PROJECTS

AI-Powered Data Cleaning & ETL Automation (In Development) | *n8n, Data Quality, ETL*

- Building a workflow to profile datasets, flag missing or inconsistent values, apply validation rules, and prepare structured outputs for analysis.
- Designing repeatable data-preparation steps to reduce manual handling and support downstream analysis.

Sales Data Analysis & Power BI Dashboard | *Power BI, Data Analysis, Visualization*

- Analyzed sales records to summarize trends and customer patterns, and presented key performance measures in a Power BI dashboard.

Telegram Link Extraction & Verification Automation | *Python, Telethon, Telegram API*

- Developed Python utilities to retrieve message and media-post links, extract relevant URLs, and organize results into text files for verification and reporting.

EDUCATION

B.E. in Electronics and Communication Engineering (ECE)

CERTIFICATION

Python Programming Certification
